

# ETO Magnetic

Kentwood, MI | Industrial

## THE CHALLENGE

ETO Magnetic is a manufacturer of electromagnetic components for vehicle and industrial technology. It was important to have a warehouse built with strong products that provide various benefits.

## THE SOLUTION

Precast concrete is the optimal choice for a warehouse as it is a sustainable solution with incredible durability, fire resistance, and sound/vibration reduction.

## THE RESULT

This warehouse project consisted of over 16,000 square feet of hollowcore and nearly 19,000 square feet of insulated composite wall panels. For a more aesthetically pleasing front, the insulated precast wall panels were finished with reveals around the warehouse.

**Total Product Square Footage: 35,736**
