

# Munger Graduate Residences

Ann Arbor, MI | Multifamily

## THE CHALLENGE

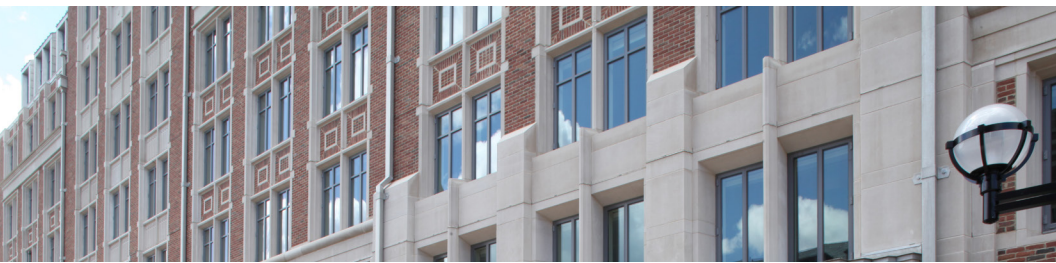

The high rise dormitories were truly a design build project on an extremely fast track schedule. In order to accomplish the task, the design team met weekly in day long meetings at the architect's offices.

## THE SOLUTION

Numerous hours and days were spent interacting to determine each other's needs and then how to satisfy them with the most economical, efficient and quality construction methodology possible.

## THE RESULT

The apartments were 6 bedroom units each with a private bath. Each apartment has a large common area along the exterior wall that is serviced by granite topped kitchen counters with two of each of the necessary kitchen appliances.

“

Thanks to your team, it took an integrated, well-coordinated team effort to achieve such extraordinary results!
