

Embassy Suites

Grand Rapids, MI | Parking Structure

THE CHALLENGE

Located in an active business, urban downtown setting, construction schedule played a crucial role in the success of this project.

THE SOLUTION

Over 437 pieces of precast were installed in just over eight weeks. How? Because our products are produced in our facility and shipped to the job site ready to be installed.

THE RESULT

This is a seven story single helix parking garage for approximately 350 cars used in conjunction with the adjacent Embassy Suites Hotel. The project has a two story high bay for delivery's to the hotel incorporated under the second level framing and separate vehicle access for valet parking from the hotel lobby.

Total Product Square Footage: 201,226
